

Seminar Series

Host-associated Microbiomes in health and disease: ecology, function and analysis of gut microbial communities in scientific research

Agripolis, Legnaro (PD)

May

18

Martin Schwarzer – Institute of Microbiology of the
Czech Academy of Sciences

From Eyjafjallajökull eruption to Science: a journey
about the role of *L. plantarum* in supporting juvenile growth

11 am – Room 2P

19

Kassem Makki – Gothenburg University

Understanding host-microbiota interactions:
Learnings on dietary fibers and gut bacteria

11 am – Room 1P

30

Nadia Andrea Andreani – Max Planck Institute for
Evolutionary Biology

Therapeutic potential of trade-offs during adaptation of
E. coli to the inflamed mouse gut

11 am – Room TAU1

31

Nicola Segata – CIBIO, University of Trento

Metagenomics of the human microbiome:
current and future biomedical applications

11 am – Room TAU2

2023
